PROFESSIONAL SUMMARY

Computer Science student with strong knowledge of web development and experience in developing full-stack applications, and interactive platforms. Skilled in python, Django REST, React, and data-driven automation, with strong problem-solving and system design abilities.

PROJECT EXPERIENCE

Alumni Networking System – Alumni Engagement & Career Platform

Python, Django REST, Channels, React, SQLite

- Built a full-stack alumni networking app that connects students, alumni, and admins through rich profiles, feeds, recommendations, jobs and events.
- Implemented JWT authentication, role-based permissions, and a personalized recommendation engine that scores skills via cosine-like similarity dictionaries.
- Delivered REST APIs plus WebSocket-based chat using Django Channels and JWT-secured sockets for live one-on-one messaging.
- Crafted React SPA with MUI, dashboard analytics, messaging UI, job board, and event RSVPs powered by centralized Axios client.

HireFlow – AI-Powered Resume Screening System

React, n8n, Google Gemini, Gmail, Google Sheets, Postgres

- Built a fully automated recruitment pipeline using n8n that screens resumes.
- Integrated Google Gemini (LLM) to extract structured data from PDFs and score candidates against job requirements.
- Implemented custom matching logic: skills overlap + experience ratio → overall score (0-100).
- Reduced manual resume screening time.
- Auto-replies to candidates ("shortlisted" or "rejected") based on AI decision.
- Deployed with Gmail trigger, processed real incoming applications.

PROJECT EXPERIENCE

Connexica Technologies – AI Intern

Remote | 2025

n8n, API Integrations, LLMs, Automation

- Built AI-driven automation workflows in n8n, coordinating multi-step logic and intelligent decision-making across internal tools.
- Integrated external APIs and optimized data flows to create reliable, scalable backend automation pipelines.
- Designed and refined prompt engineering + LLM interaction patterns to improve structured outputs and workflow accuracy.

EDUCATION

New Summit College

Shantinagar, Kathmandu

Bsc. Computer Science and Information Technology

Janjyoti Secondary Boarding School

Gulariya, Bardiya

+2 (Science)

Graduation Date: Jan 2021

SKILLS & INTERESTS

Languages: C, C++, Python, JavaScript

Backend: Django REST Framework, Django Channels, REST APIs

Frontend / Frameworks: React.js

Databases: PostgreSQL, SQLite, Oracle

Tools & Technologies: Git, GitHub, Postman, n8n, Google Gemini API, Google Sheets, Gmail Integration

Soft Skills: Problem Solving, Communication, Self-Learning, Adaptability

Interests: Full-Stack Development, System Design, AI, Data Structures & Algorithms
